

Djerba by Tracks Ride – 1 day

An island tour by 4x4, completely by tracks : the real face of Djerba.

In the course of tracks, between menzels, palm groves and fields of olive trees, you will discover the life of the island's heart .

On tracks, alternately sandy and flexible , then rocky and “shaking around”, you will progress between the standing banks of aloe or prickly pears. This original approach, between sea and countryside, between plains and valleys, will lead you to numerous sites of the island.

Everything is not said... Dare the discovery !

At the other end of the “Roman Road”, on the mainland, you can also consider discovering [Zarzis and its area](#).
